Carwash and Fuel Station LED Conversion

Turnkey LED Solutions

Renovating and Revitalizing

- Phil Lawrence recently acquired this Fuel Station, Convenience Store, and Carwash. When PLG reached out to him regarding his site lighting, there were several canopy lights out, which made the location look out of business to night time passing motorists. The facility was neglected by previous ownership, so there were a lot of repairs that had to be handled at once, which included this lighting. Since PLG is not just a LED manufacturer, but a complete **SOLUTION PROVIDER**, a project was developed that dealt with the issues at hand.

Project Financing

- Often, when the initial cost of LED conversion is spread out over the term of a commercial loan, the monthly savings are greater than the monthly loan payment, creating **POSITIVE CASHFLOW**.

“Within one week we saw a 17% increase in fuel sales.”

- Phil Lawrence, Owner

Before and After

**Before:
175W MH**

**After:
250W LED**

PLGLED.com

By The Numbers:

Energy Reduced: 84%

Improved business sales
